

-/ STRAIL® road marking

STRAIL® is able to withstand even harshest conditions.

The two-part system consists of a special primer, as well as abrasion-proof paint.

STRAIL® road marking is characterized by its ease of use. It is simple to apply using a hand roller, an airless sprayer or (for smaller marking jobs) a handy spray can. Optional glass beads can be sprinkled into the freshly applied colour to create good night visibility (reflection effect).

Full trial tests have confirmed the excellent laboratory results with regard to adhesion and durability.

- ◆ Simple handling (manual or using an airless sprayer)
- ◆ Durable, even in case of heavy traffic
- ◆ Weatherproof and elastic
- ◆ Easy to repair with a new coating
- ◆ Any colours available
